

Finding My Place in the World

Universe Facts

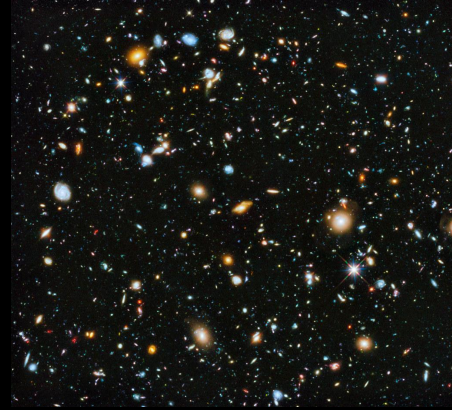

The universe has billions of stars

STAR SONG

There are more stars than grains of sand on the beach.

It is so big 90% of it has not been explored

There are many galaxies in the universe

The Milky Way

Earth and our Solar System is in the Milky Way

It is 13.6 billion years old.

There are billions of stars in the Milky Way

You can see the Milky Way on a clear night

A black holes is in the center of the Milky Way

It is so big we havent explored it all yet
